How to Access the WebApp

The Abas WebApp is accessible via the **Kasa RemoteApp Proxy** on any desktop or directly via the web from any desktop or mobile device.

Kasa RemoteApp Proxy URL:

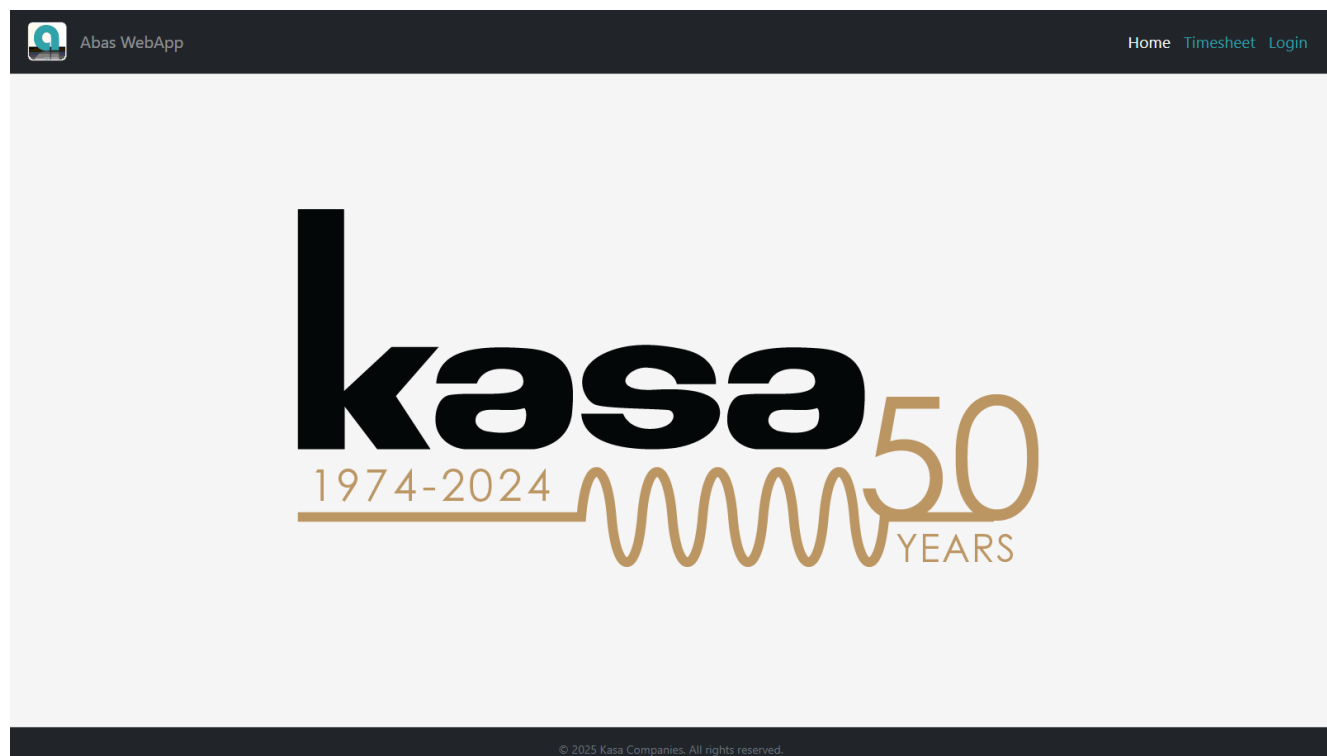

<https://remoteapp-kasacompanies.msappproxy.net/RDweb/webclient/>

Directly from the Web URL:

<https://abaswebapp-kasacompanies.msappproxy.net/>

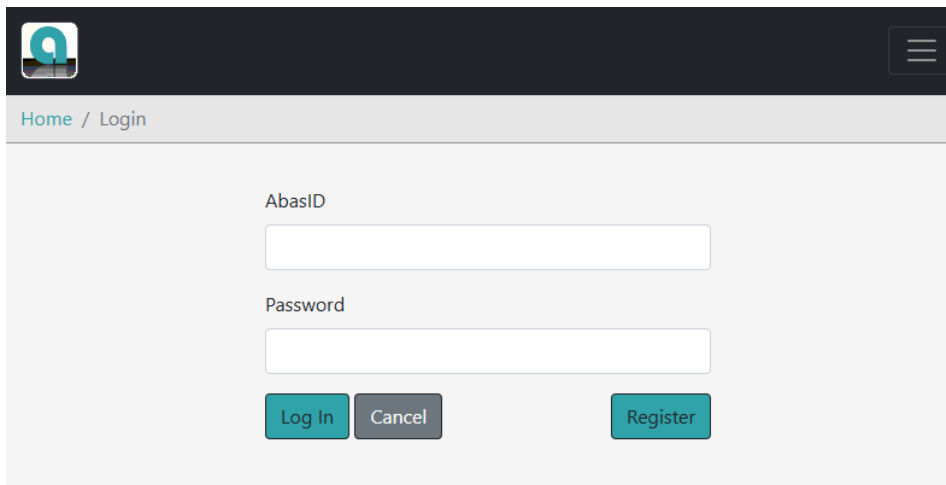

You may get a prompt to login with your Kasa Microsoft account and an MFA Prompt, depending on what device you are using to access the Abas WebApp.

Once you are connected you will see a screen like this:

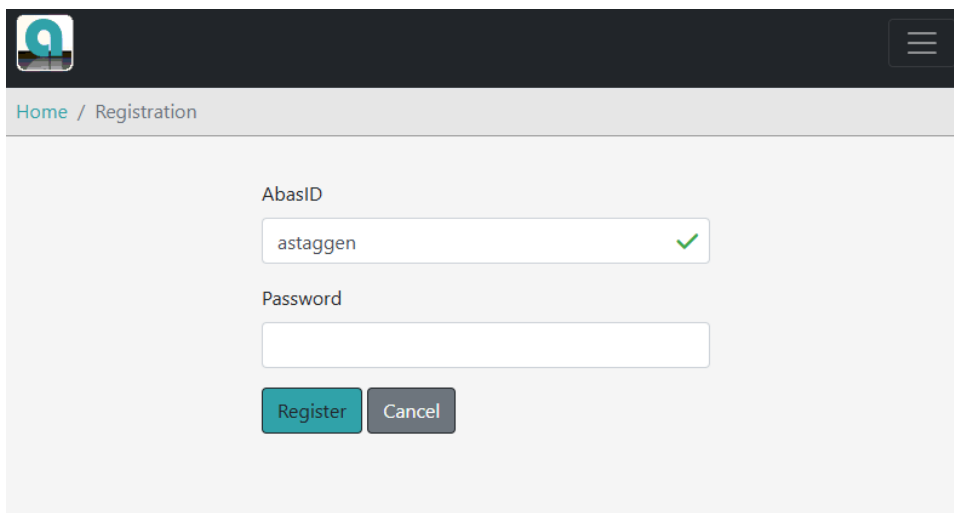

Login and Registration

The first thing you will need to do is go to the **Login** page.

The screenshot shows the 'Login' page of a web application. At the top, there is a dark header with a logo on the left and a menu icon on the right. Below the header, a breadcrumb trail reads 'Home / Login'. The main content area contains two input fields: 'AbasID' and 'Password'. Below these fields are three buttons: 'Log In' (teal), 'Cancel' (grey), and 'Register' (teal).

If you have not registered a new password yet, click **Register**. Otherwise enter your Abas ID / Username (*same thing you use in abas to view your timesheet or enter on the excel import spreadsheet*) and password to login.

The screenshot shows the 'Registration' page of the same web application. The header and breadcrumb trail ('Home / Registration') are consistent with the previous page. The 'AbasID' input field now contains the text 'astaggen' and has a green checkmark to its right, indicating it is valid. The 'Password' input field is empty. Below the fields are two buttons: 'Register' (teal) and 'Cancel' (grey).

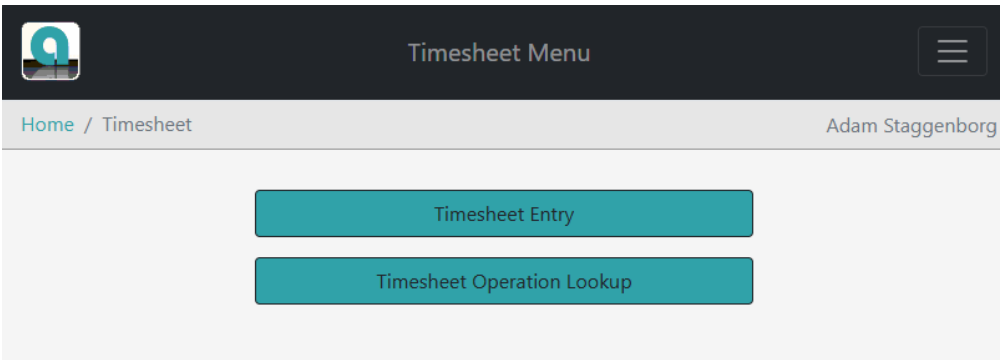

Enter your Abas ID / Username. If the ID / Username you entered valid you will see a green checkmark on the input field.

Then enter your current Abas password or any other password if you would like to use something different.

Click **Register**. Then login with your Abas ID / Username and password.

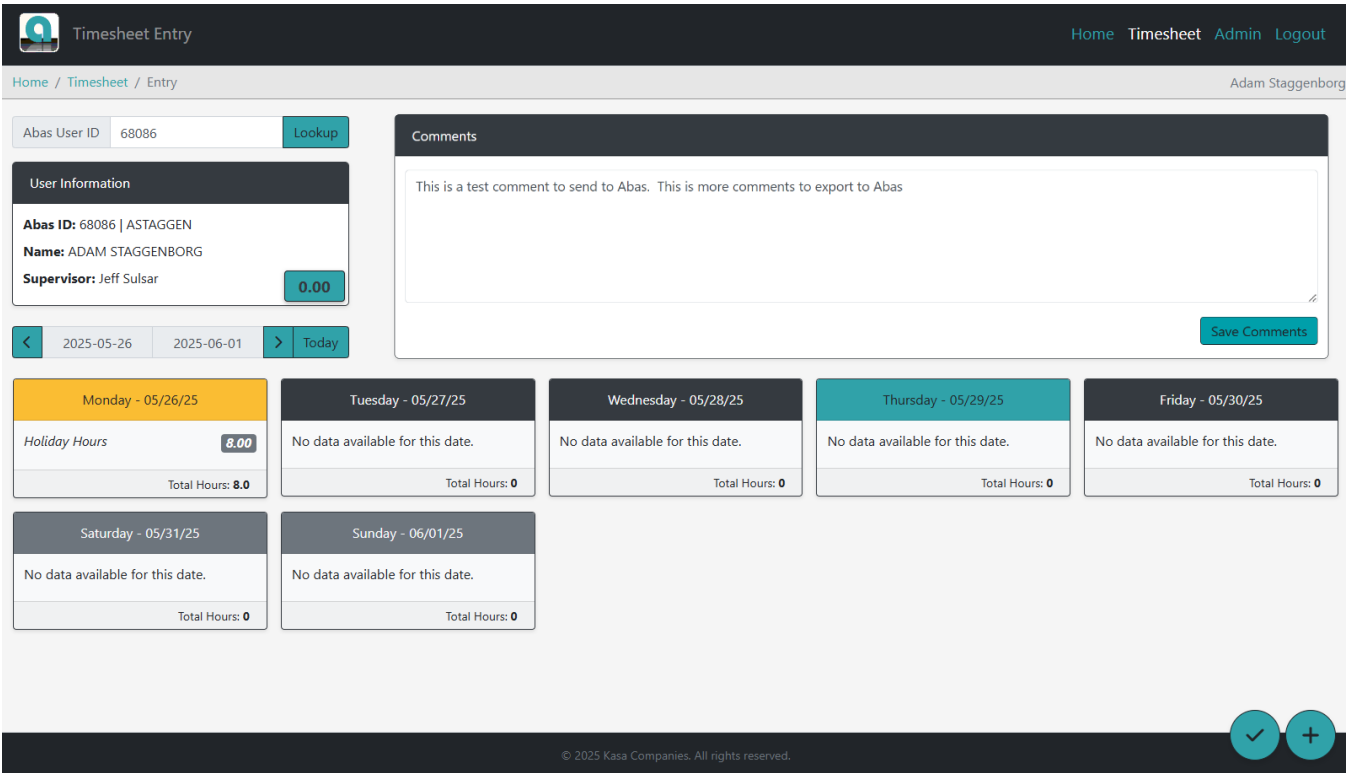

Time Entry Overview

Once you are logged in, click on Timesheet.

Then you can choose either Timesheet Entry to enter time for the week or you can choose to just look up workorder operations.

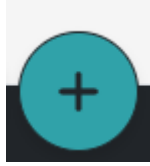

Click on Timesheet Entry and you will get a list of this week’s timecards.

There are three colors highlights possible for each day. Yellow = Holiday, Teal = Current Day of Week, Greys = Dark is work week and light is weekend days.

You can use the left and right arrow buttons to move between weeks or to the current week with the Today button.

Entering Job Time

To enter time, Click on the button in the bottom right corner of the screen.

Hours Worked

Hours Worked

Copy Previous Week

Add to Timesheet

From this screen you can either copy the time from last week with the **Copy Previous Week** button or you can enter time for a specific day, by selecting the day of the week at the top, then selecting your project, workorder, and operation. Enter the number of hours worked, then click **Add to Timesheet**.

**If you use the Copy Previous Week button, any time already entered for the current week will be removed and only the time from the previous week will remain.*

***It can take up to **10 minutes** for the timesheet data to show up in abas for the job time that you enter here.*

Modifying Job Time

Once you have entered all the time for the week you will see entries under each day you entered.

8.00

Total Hours: 8.00

You can copy an existing time entry to another day by hovering over the time entry and clicking the copy button. You can also delete the time entry by clicking the red trashcan button.

These changes or deletions can take up to **10 minutes to show up in abas.*

Finalizing Attendance Time

Once you are done entering time for the week you will click on the button to finalize your attendance time.

You will see a screen similar to the one on the right. This screen will show each day you have entered time and default to paycode E1 for the full hours you entered on that day. You can change the hours if needed and you can split the hours up by clicking the green + button.

PTO, Bereavement, and Jury Duty will automatically be split out and set to their proper pay code.

When you click finalize, it will submit the attendance time and comments to the abas for the attendance tab.

It can take up to **10 minutes for this data to appear in abas.*

Finalize Payroll Time

Total Attendance Hours: 8.00		
Total Attendance Hours for Week: 40.00		

Finalize

Fixing Your Timesheet

You can edit job time and finalize attendance as many times as needed until noon on Monday of the next week. After that if you need to enter time or fix time you will have to login to abas and fix the data there.

Timesheet PDF

You will get a PDF copy of your timesheet after you finalize and submit your time. Once Abas has imported your finalized data, a PDF will be generated and emailed to you.

**The data import and email generation can take up to 10 minutes.*
